

GridPay Dealer Partner Onboarding

August 10, 2026
Prepared for Yousuf Khan (Houston) and Noah Keegan (Illinois)

1. The Partnership

- You sell batteries on your own accounts and offer GridPay on every deal moving forward.
- GridPay builds each partner a dedicated AI sales agent for a **one time setup fee of \$500**. The agent answers your inbound calls, follows up with every responder, and books appointments straight to your calendar.
- Ongoing structure will be either a **percentage of closed deals or a monthly retainer**, finalized at the Friday session.
- Group goal: **1 megawatt of enrolled capacity, roughly 50 batteries**, which unlocks virtual power plant revenue for the whole book.
- Owned systems qualify for automated energy earnings. Leased systems get monitoring and advocacy only.

2. What GridPay Delivers

Deliverable	Detail
AI sales agent	Trained on your own call scripts and voice of your market. Handles inbound and follows up with every opted in lead, day and night.
CRM workspace	Built for you, scripts cloned in, lead tracking moves out of notes apps so the agent can learn from every touch.
Territory lead list	Illinois exclusive: 750 orphaned solar homes for Noah. Houston: 308 homes for Yousuf, 274 of which already received our mail piece. Released upon signature of the data protection agreement.
Sales briefing	The GridPay pitch, verified numbers, objection handling, and the claims you can and cannot make. Attached with this packet.
Group chat	Dedicated channel for the three of us for daily coordination.

3. What We Need From You Before Friday

- A quality microphone (USB or lavalier). Your agent is trained on clean audio.
- A headshot and a few photos for your agent profile and marketing.
- Your Scout subscription decision. We are exploring a group discount for all three seats.
- **Yousuf**: a session with Devan to walk through your call sets so the scripts train accurately.
- **Noah**: register your independent dealer account so the partnership paperwork lines up.
- Start logging every lead in the CRM once access lands. No more personal note apps.

4. Ground Rules

The AI agent never cold calls. It works inbound calls and follows up with people who responded or opted in. Cold outreach stays human, with do not call requests logged within 24 hours. This keeps every one of us clean under federal calling rules.

Lead data stays confidential. Lists are licensed for your territory only, never uploaded to ad platforms, never shared outside the partnership, and returned if the partnership ends.

Honesty is the brand. Every number we pitch settles against the utility's own meter data. If the math does not work for a homeowner, we say so and walk. That reputation is worth more than any single deal.

5. Acknowledgment

I have read this onboarding packet, I agree to the ground rules above, and I understand the lead lists remain GridPay property pending the full data protection agreement.
